REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 45-51 is the inclusion of a printing method using an electrification member that does not touch the surface of the image holding body; and rotating the electrification member and the image holding body respectively in such a manner that, in a place where a distance between the electrification member and the image holding body is shortest, facing surfaces thereof move in opposite directions. The steps of attracting and electrifying includes attracting left-over developer component that is left over on the image holding body after transcription, so as to remove the left-over developer component from the image holding body, and the electrifying being performed to electrify the image holding body. This in combination of the rest of the limitations of the claims is found in all of claims 45-51, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
